**REQUIRED**

Clinic Account #: \_\_\_\_\_ Collection Date: \_\_\_\_\_

Hospital/Clinic: \_\_\_\_\_ Zip Code: \_\_\_\_\_

Veterinarian: \_\_\_\_\_ Owner Last Name: \_\_\_\_\_

Animal Name: \_\_\_\_\_ Species: \_\_\_\_\_ Breed: \_\_\_\_\_

Age: \_\_\_\_\_ Sex:  M  M(N)  F  F(S) Patient ID/MRN: \_\_\_\_\_

**Staff Pet:**  Please check if this is for an employee's personal pet.\*

**Required: History/Lesion Description** Failure to provide appropriate information may delay results.

**Sample/Site Location**

	# of Slides	# of Tissue Pieces	# of Tubes
1. _____	_____	_____	_____
2. _____	_____	_____	_____
3. _____	_____	_____	_____

*Standard margin evaluation is included on all applicable specimens.*

Duration of Lesion/Clinical Signs (Attach additional pages as needed): \_\_\_\_\_

Specific questions/concerns (if any) regarding this specimen: \_\_\_\_\_

For mass lesions: Size: \_\_\_\_\_ Shape: \_\_\_\_\_ Color: \_\_\_\_\_ Consistency: \_\_\_\_\_ Distribution: \_\_\_\_\_

Working clinical diagnosis: \_\_\_\_\_

Pathologist preference (accommodated when possible): \_\_\_\_\_

**Histopathology**

- ZN100 Histopathology Simple, Single Site** Formalin-fixed tissue. Single site, no more than 10 cm in any dimension, **not for dermatologic disease** or with other criteria of Complex Level 1 or 2.
- ZN101 Histopathology Simple, Multiple Sites (up to 5 sites)** Formalin-fixed tissue. Simple samples from up to 5 unique sites, no more than 10 cm in any dimension.
- ZN102 Histopathology Complex, Level 1** Fresh or formalin-fixed tissue. Skin biopsies for dermatologic disease (without dermatologist consult); multiple gastrointestinal biopsies; bone marrow; whole organs/major components of organs: eye, spleen, testicles, uterus/ovaries, mammary chains (2 or more connected glands), amputated digit or tail, liver lobe, or lung lobe; large samples (>10cm in any dimension); individual teeth or other small samples containing bone; simple samples from 6-15 unique sites.
- ZN103 Histopathology Complex, Level 2** Fresh or formalin-fixed tissue. Examples: Mandible, maxilla (all jaws, regardless of size), amputated limb, or other large/atypical samples containing bone; multiple Complex Level 1 samples; or Simple samples from >15 sites.
- ZN301 Necropsy in a Jar** For specimens collected (and placed in formalin) while performing an in-clinic necropsy or formalin-fixed whole bodies < 100 g. NOT for fresh whole bodies or fresh heads. Tissue, detailed history, differential diagnosis, and gross necropsy findings are required.

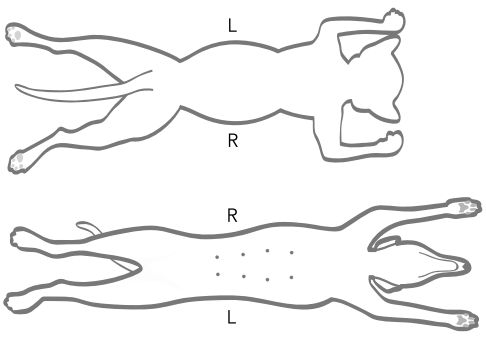

NOTES

**Specialty Histopathology Panels**

- ZN400 Dermatopathology Panel (includes Histopathology & Dermatologist Consult)** Consult provided after dermatopathology. Tissue, detailed history, and images are required. Skin punch biopsies or other similarly sized skin sample(s). Addendum provided with dermatologist case management guidance. Clinical images can be sent to [referencelabpathology@zoetis.com](mailto:referencelabpathology@zoetis.com)
- ZN500 Hepatopathology (Liver) Panel** H&E, copper, iron, and connective tissue stains and copper quantification. Please submit at least three 1 cm, 14G hepatic needle biopsies, a wedge biopsy, or other larger liver tissue sample.
- ZN25000541 Nephropathology (Renal) Panel** H&E, PAS, trichrome, Jones methenamine silver stains and Congo red staining, if indicated.

**Cytopathology**

- 7120 Cytopathology Simple/Single Site** Unstained, air-dried slides or fluid in LTT
  - Single site
  - Multiple lymph nodes
  - Fluid/Flush from lesion
  - Joint fluid (slides only)
- 7201 Cytopathology Complex** Unstained, air-dried slides or fluid in LTT
  - FNA of more than one site
  - Joint fluid (fluid ± slides)
  - CSF
  - Cavitary effusion fluid analysis
  - Bone marrow
  - Airway washes (BAL/TTW)
