

This guide will walk you through configuring your Android™ mobile device with the VETSCAN VUE Rapid Test Analyzer. Before setup, you must install the VETSCAN VUE app on your Android mobile device and activate your VETSCAN VUE account. **If you have not received a welcome email with a link to activate your account, please contact Zoetis Technical Support at 1 800 822 2947 or dxsupport@zoetis.com before continuing.**

1 Log in to your VETSCAN VUE account

Open the VETSCAN VUE app on your Android mobile device.

Press **x** to access the login screen. Enter the email you registered with Zoetis and the password you set up when you activated your VUE account.

Press **LOGIN**.

Please note: Your mobile device must be connected to the internet to log in to the VETSCAN VUE app and complete setup.

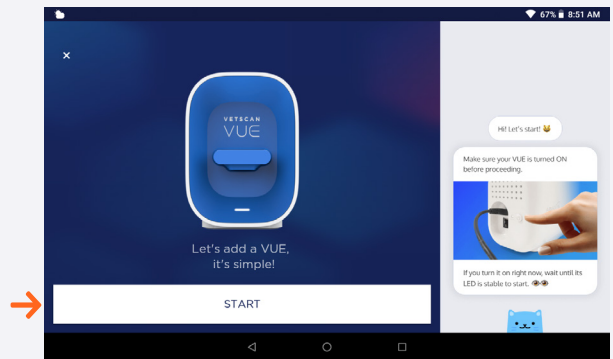

2 Turn on your VETSCAN VUE

Follow the on-screen prompts.

Unbox your VETSCAN VUE, connect it to power, and turn it on.

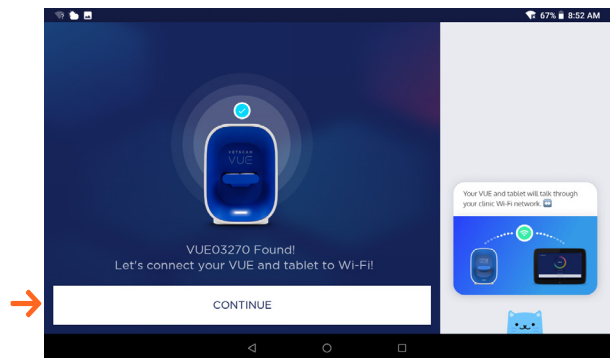

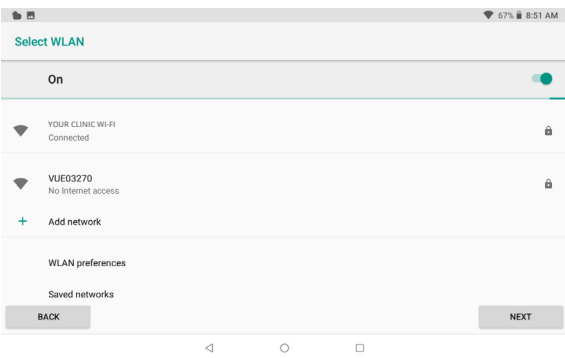

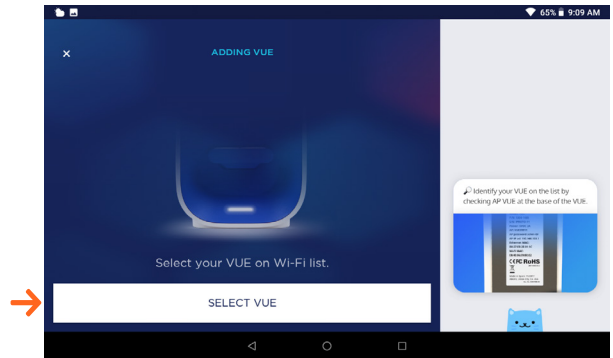

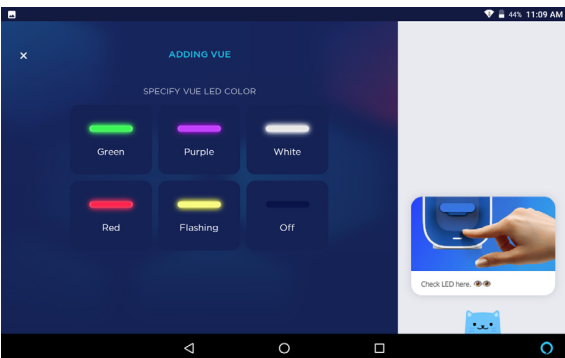

In the VETSCAN VUE app, press **START**.

3 Connect to your VETSCAN VUE Rapid Test Analyzer

Check the color light on your VETSCAN VUE. **Select** the color that appears on your VETSCAN VUE.

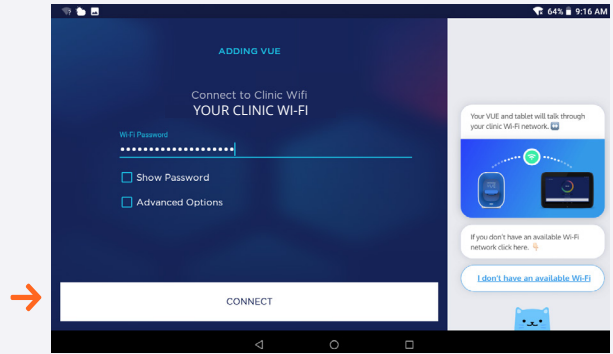

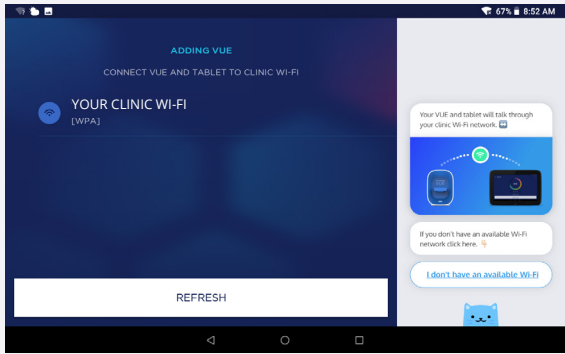

Press **SELECT VUE** and choose the VUE to connect to from the list. **Identify** your VUE on the list by checking **AP VUE** at the base of your VUE. Confirm that your VUE has been found. Press **CONTINUE**.

4 Connect your VUE to Wi-Fi

Choose your clinic network from the list. Enter your network password (case-sensitive), then press **CONNECT**.

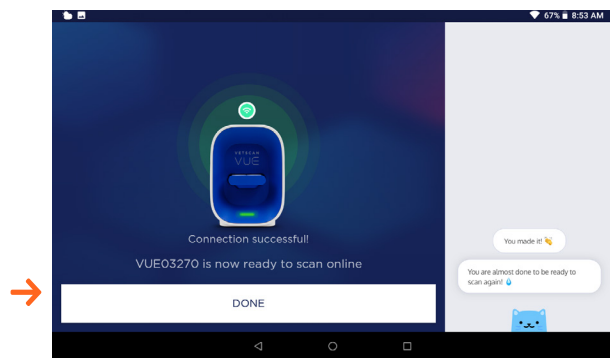

Connecting may take several seconds.

5 Confirm that your VETSCAN VUE is connected

Confirm that the color light on your VETSCAN VUE is solid green.

Press **DONE**.

Congratulations, you are now ready to scan a VETSCAN Rapid Test with your VUE!
